SKILLS

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, HTML, CSS

Backend: Node.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, Docker, Linux, GitHub

EDUCATION

Algonquin College - Ottawa, ON

05/2026

Associate of Applied Science: Computer Programming

PROJECTS

Loopit Movie & TV Discovery Platform

<https://loopit-pi.vercel.app> | <https://github.com/nytkevin/loopit>

- Built a movie and TV discovery platform with search and genre-based filtering.
- Integrated third-party APIs to display real-time ratings, cast, and media details.
- Created responsive interfaces and reusable components for mobile and desktop users.

Spotify Music Clone

<https://github.com/nytkevin/spotify-clone>

- Built a Spotify-inspired web app with user authentication and music data integration.
- Integrated Spotify APIs to display playlists, tracks, and artist information.
- Managed authentication sessions and token handling using NextAuth.js.
